Location

INTERPHEX 2017
Jacob K. Javits Convention Center
655 West 34th Street | New York, NY, 10001

About the Tours

IPS, in partnership with *Pharmaceutical Processing*, is proud to announce that we will be hosting Technologies Tours during INTERPHEX for the seventh year in a row. The goal of the IPS Technologies Tours is to share our knowledge and experience by informing attendees of the most innovative and best performing equipment, both tried and true and new to the market, which could suit their manufacturing needs. A benefit of attending the Tours is the ability to utilize time at the show efficiently by having independent subject matter experts navigate the attendees through a select group of preferred and vetted vendors.

As the premier pharmaceutical, biotechnology, and medical device development and manufacturing showcase event in North America, INTERPHEX provides a unique venue for IPS to show customers firsthand the latest technologies and equipment that can improve their operations. *Pharmaceutical Processing*, a leading source for contract services and manufacturing news, as well as the latest packaging, processing and new product developments, will be publishing a printed guide for the Tours.

Since establishing the Technologies Tours, IPS has continually added innovative concepts to INTERPHEX. This year, IPS is offering six distinct Technologies Tours: Aseptic Small-Scale/Modular; Aseptic Full-Scale & Flexible; Biomanufacturing; Packaging & Inspection; and Modular Construction. The Tours will showcase the top, cutting-edge equipment and technology innovations in each technical category. The Tours will be held on Wednesday, March 22, 2017 at 10:00am and 1:00pm, and typically run two hours long.
