

Meet the Expert

Len has hands on experience managing, supervising and designing Packaging operations in the Pharmaceutical industry. He adds a unique owner's perspective to the design and installation of Packaging equipment to both new and existing facilities.

Len offers 16 years of experience in the Pharmaceutical industry. He has 13 years of experience in operations groups working as an employee of major Pharmaceutical companies. His roles varied from front line manufacturing supervisor to building director for existing facilities and startup operations in new facilities. Additional roles within engineering groups also rounded out his background within the industry.

Examples of recent projects include:

- Conceptual design of high speed packaging operations in Brazil, Mexico, and the United States. These projects included packaging configurations for vials, syringes, tablets, and blow fill seal containers.
- Basic design and Detailed design of packaging equipment and packaging facilities.
- Capacity Analysis and process optimization for sterile and non-sterile products.
- Integration of Serialization equipment into existing and new facilities.

Combining his operational back ground with his engineering experience Len provides the optimal balance of technology, regulatory impact, and process optimization to provide the customer with a machine and facility that is both efficient and compliant.
